

Accelerometers

Newmark Laboratory uses Terra Technology Corp. and Endevco Accelerometers. This highly sensitive equipment has been employed in earthquake simulations on the Shake Table among other broad uses in the lab.

Newmark Laboratory has the following transducers available for experimentation:

Type	Range	Quantity
Endevco	<u>± 15.0 g</u>	7
	<u>± 25.0 g</u>	19
Terra	<u>± 0.1 g - 5.0 g</u>	11
