

Cable-Extension Position Transducers (Yo-Yo Gauges)

Newmark Laboratory owns a large variety of Cable-Extension Position Transducers (yo-yo gauges) over varying ranges. The Newmark yo-yo gauges are used in experimentation to accurately measure displacement in as much as a 50.0" range. This product line comes from [Celesco™](#).

The following cable-extension position transducers are available at NSEL:

Range (in)	Quantity	Model
50	1	PT510 50"
25	1	PT510 25"
10	10	PT101 10"
9	1	MT2A 9"
5	10	PTX101 5"
2	3	PTX101 2"
